

## NGCA and KPB team up to recycle old heating units

North Georgia Community Action does it again! The NGCA has been doing weatherization for senior disabled citizens in the surrounding 10 counties, supporting the MATTS transportation program, Meals on Wheels and the list goes on.

Now, the Executive Director, Jonathan Ray and his assistant Jeff, manager of the Winterization Program, have started recycling at their home office in Jasper.

Pictured here with KPB President Kevin Osborne, they have committed to be a leader in the community. Jeff stated that they are now recycling heating plants from homes that have been replaced with efficient units that can save up to 30 percent on heating bills.

KPB thanks NGCA for their partnership and good stewardship in the community.
